## DypsXSL a free Excel generator

Hits: 4,369

**Description:** DypsXSL let you create native Microsoft Excel on the fly and does not require that Microsoft Office be installed on the server, so it can deliver documents faster without the performance penalties and instability associated with instantiating multiple copies of the Excel objects on a Web server. DypsXSL's simple and intuitive object model makes it very easy to use. Full support will be provided on the website forum.
