I've been using Vivvo on couple of websites for quite a time now, and I truly am impressed with power and simplicity it brings. Moreover, their support is definitely up to the task, you really feel its not some "robots" cut'n'pasting template responses. A+ overall.

I purchased this CMS system and I wish to express my disappointment. You cannot run Javascript on the program except Google. So you can run google ads and google analytics. If you want to use your own tracker...forgetaboutit. If you want to run your ads through your ad manager...forgetaboutit and support while present often takes days before and after initial response. Other than that, it is a good news program
