## FxMods - FullXml

Hits: 10,189

**Description:** FullXML is an open source website Portal and Content Management System (CMS). FullXML uses ASP, XML and XSL, supports multiple languages and lots of skins that you can easily customize to suit your own needs.

The original author of FullXML, John Roland, announced he would stop development for version 2.\*. In step Mig and Jes, founders of FXmods. Mig and Jes have made many improvements to FullXML and recently published FX 2.4.2 - the FXmods incarnation of FullXML. Like the original project, all the code is open source and is compatible with any of the previous versions.

Here at the FXmods website you can see some of the new features in action and download your own FREE copy of FX. Information on how to produce your own modifications and information about the existing code is also available in articles throughout our website and in the forums. Try out FX 2.4.2 at our demo site now.
