SpyMyPC PRO

Hits: 848

Description: An ideal spy software package to monitor online and offline computer activities. This computer monitoring software runs invisible and records what your employee, child or other users do on the computer. The completely invisible and hardly traceable key logger will tell you when, how and what they did on the Internet. The program can send you reports via e-mail. You will have access to all e-mail written by your kids and all their passwords.

Resource Specifications

Version:	5.4.3
