Awesome Script and Support, Mar 15th, 2006

Reviewed By: DaveJames

An impressive script, Entergal MX (directory/yellow pages version) manages to combine an easy to use, modern interface with a great deal of clever features and user customization. There is no other script quite like this one. The support provided by the support team is second-to-none!

Vital parts of the php code are encoded!, Oct 15th, 2008

Reviewed By: deschil

Please be aware that vital parts of the php code are encoded and can't be customized. I requested for a change (that was already present in previous versions) but support organisation are not willing to help me. If you want good support and open code, I would suggest to look further.
