Anaconda! Foundation Series

Hits: 1,124

Description: The Anaconda Foundation Series of products offer metasearching of Software, Computer Hardware, Electronics, Video Games, Books, Music, Videos, Toys, Web Sites, MP3s, Usenet Forums, Auctions, and Jobs. Foundation Series architecture is a main program that constitutes the "engine" of all of the new scripts, with each new product a stand-alone, drop-in "module" that works with the engine. Each of the new scripts queries the best data sources for its given topic and returns the results in a neat, concise consolidated format using the look and feel of your own website. Search results can now all be CACHED locally providing your users with blazing speed and taking a burden off of your server's CPU and bandwidth consumption.

Resource Specifications

Price:	\$149+
