# Random Quote Version 3.1

Hits: 5,018

**Description:** This random quote script is based on earlier versions and is the product of all of the great suggestions I have received. Included in this script are a number of options including:

1. Random Quotes being pulled from a flat file database.
2. Ability to randomly pull from multiple flat file databases.
3. Ability to set a variable which will control how often a new quote is displayed - Every time the page is loaded, every minute, every hour, once a week, etc. This is done by setting a cookie.
