ASP Spell Check - Spell Checking For ASP, Ajax , Flash & ASP.Net,

Hits: 5,445

Description: ASP Spell Check is a SpellCheck component for Microsoft ASP web applications.

ASP Spell Check provides international spellchecking in 11 languages - including English, French, German, Italian, Dutch, Portuguese, Swedish, Danish and Spanish.

SpellCheck integrates seamlessly with Forms on Websites, Content management systems, Web-mail applications, Rich Editors (WYSIWYGs) & Intranets.

ASP SpellCheck works very much like popular word-processing spellcheckers.

Advanced Suggestion ranking algorithm (based on Genome mapping technology). A new JavaScript interface allows you to use the spellchecker without ASP at all.

ASP SpellCheck has many unique and advanced features spellcheckers, including: AutoCorrect, Grammar Checking, Profanity Filtering & Personal Dictionaries for each User.

Now Supports Flash Actionscript, JavaScript, ASP, ASP,Net and AJAX.
