phpXML Lite 1.0.5

Hits: 7,409

Description: This class is completely stand-alone and is designed to make the XML communications nice and simple in PHP. Because it's stand-alone, it does not require you to install extra libraries, like PEAR or PECL. The class properties and methods are modeled after the XML class in Flash, so the transition back and forth between Flash and PHP is much easier.

Resource Specifications

Version:	1.0.5
Platform(s):	linux, windows, freebsd, osx, sun
Date Added:	Sep 23rd, 2005
Last Updated:	Mar 27th, 2007
Author:	Andy Frey, onesandzero.biz

Average Visitor Rating:  **5.00** (out of 5)

Number of Ratings: 3 Votes

Average Member Rating:  **0.00** (out of 5)

Number of Reviews: 0 Reviews
