## ScepBB

Hits: 5,187

**Description:** ScepBB is a new secure message board, compatible with PHP4 and 5, and MYSQL4. No bloat, no images, it runs as fast as the server can handle text and SQL queries. It's now a stable 1.0 release, so download away.

The one thing I love about this forum is that it has no images. No images equals low bandwidth requirements. Low bandwidth requirements equals more possible users and less costs. But saying that, it is also very easily modified and can be changed by a PHP novice. This really is just the thing for me. I've downloaded it already!
