## WebGrub MySQL News Feed v1.1

Hits: 1,664

**Description:** These are the three main elements:

- 1| A chunk of code that takes a section of the latest news entries and displays a 'continue reading' button.
- 2| The main news page that displays all of the latest news.
- 3| The password protected administration page that allows the user to add, edit and delete news entries from the database.

Features:

- Automatic install
- Easy to configure
- MySQL database driven
- Add/Edit/Delete news with ease
- Fully customisable (including colours and table width)
- Add to your current site
- You choose the amount of news displayed
- You choose the amount of words displayed
- Password protected
