This was exactly what I needed at this point for my site - something simple but flexible and with just the features I needed. The support since I have bought has been great and I know this will be a very popular feature on my site.

We've been using this software for almost a year now. One thing that I can say about it is that it works well and the support is one of the best I've seen. Anytime I've had to contact them, they were right on it and took care of us.
