mCore - SMS & WAP Push Component

Hits: 2,592

Description: mCore Lite is a robust and easy-to-use component that will enable your desktop or web based applications for 2-way SMS & WAP Push. It can be used with any ETSI 07.05 compliant GSM modem or phone handset connected to the PC serial port using a data cable or Infrared device etc. mCore can be used for developing applications that require to send/receive SMS in English as well as applications that require to send/receive SMS in local languages (e.g. Arabic, Chinese, Thai, Greek, Hebrew, Russian, Hindi etc.). Allows you to specify the action, created and expiry attributes for WAP Push

Great product!

I had downloaded almost 15 different SMS components from various sites. All of them could send SMS but had some limitation or the other. After downloading mCore, I did not have to look for any other product. All its features worked with 3 different makes of GSM modems that I have. Excellent help file (served like a tutorial). Great Sample codes... and voila am sending SMS in chinese too!

I wish the publisher adds delivery report and some .Net samples soon.
