Amazon.com Price Change Notification Bookmarklet

Hits: 823

Description: Amazon.com changes prices frequently, and very often the price is greatly reduced.

This free service will monitor prices by your request. As soon as price change matches your conditions, the service will alert you.

Use our Bookmarklet to create Price Change Notifications for Items found on Amazon Stores, or almost all Amazon Associates Stores.

Next time you surf Amazon US, UK, Germany, France, Canada, or numberless Amazon-affiliated Stores, and want to keep an eye on the price of a particular item, click your new bookmark, and it'll take you to the Price Change Notification subscription page, and automatically fill-up required information.

Resource Specifications

Version:	1.0
