Blog System (new version 1.5)

Hits: 74,264

Description: New version 1.5 - you're welcome to visit our site and check out the new features.

With Blog System you could easily launch your own customized and powerful multi language blog portal, you'll have full control over the whole system and your bloggers will benefit from user friendly interface with plenty of features allowing them to create and maintain great looking blogs. In order to run a blog portal with it, you don't need your own dedicated server but just a shared hosting package supporting PHP and MySQL. Blog System offers very rich functionality for the blog users to update and customize their blogs (add notes, comments, upload pictures and create photo albums, customize the blog look and feel with dozens of templates and backgrounds, create lists, rss, trackbacks, upload audio and video files and others) and for the administrators to monitor and control the whole system (monitor the users, space occupied and bandwidth of the blogs, put advertisements like google adsense etc.)

Excellent Blog!, Aug 31st, 2006

Reviewed By: ncmike

This blog has it all! GREAT features and GREAT support! If you're still searching for the perfect blog, look no further. I've researched for countless hours and this is by far the best blog I have encountered. The team who has developed this are top-notch. If you have any problems at all, they will not hesitate to help. I give this two thumbs up and the imaginary thumbs that I don't have. Thank you for creating this amazing product!

Excellent Software, Sep 22nd, 2006

Reviewed By: Acidox

I'm recent purchase a copy of Blog and i'm still working in many customisations. I found it easy to install, Powerfull and preatty easy to customise. Good support, but i'm astill asking for a Open forum to discuss aboutmodifications, possible's bugs, etc. My best recommendation for blog system. I'm very happy with it, and i'm sure than my users will love it.

Good, almost great, Aug 2nd, 2007

Reviewed By: chernann

I bought this to integrate with an existing community site and the code was easy to understand.
Lots of nice features, but missing the slick 2.0 style of recent Wordpress releases.
Very heavy on the billing end; who pays for blog hosting these days?
Inconveniencences -> Blog templates with RSS and Atom feeds prepopulated (hassle to add them in by hand)
-> HREFs not in quotes,caused minor integration hassle
-> Translations not fully complete,with lots of language strings still embedded in logic

50 / 50, Oct 29th, 2007

Reviewed By: fishnchips

The system works great and the code is fairly logical ordered. But it feels like it's still work in progress: there is a lot of style mixed with logic: to edit the front template you have to edit an external .css file, edit css data in the menu file and edit css data stored in the database. The author clearly knows about 3-tiered design but is not using it consistently. Also there is NO input validation on _GET and _POST variables!

Excellent script, Dec 28th, 2007

Reviewed By: brady315

I used several other blogging scripts in the past but really liked this one - very easy to install, nice interface and features. The support is one of the fastest I've seen. This is a excellent script which seems to be done by real professionals. Highly recommended.

Perfect multi user blogging script!, Jan 27th, 2008

Reviewed By: loo.nguyen

This script is super easy to install and use. The interface is very beautiful and there is a very long list of nice functionalities. The service and support are excellent, thank you so much!

Brilliant blog ware!, Feb 3rd, 2008

Reviewed By: espsoftwaresolutions

I hosted blogs with this suite for the last couple of years. I rarely ever needed support and when I did, support was always fast! Very stable software and the admin panel is tight!

Nice script, May 30th, 2008

Reviewed By: valerio.pujante

Really easy to use and install and also it has beautiful interface for both bloggers and administrators. I needed support 1-2 times and my questions were answered fast and the answers provided were very helpful. It's a pleasure to use it, I highly recommend it!

Blog Hosting System, Aug 7th, 2008

Reviewed By: BangWeb

I have used lots of scripts and I have to say that this have been a great script to work with. So far I haven't found any bugs(32k+ bloggers on one of our sites). It was fast to get up. It functions very well - very intuitive, which is great for our novice bloggers. I also have to say that their support of the product has been top notch excellent. We own 2 licenses and are in the process of starting number 3. Our main blog hosting site has over 32,000 bloggers and it runs fast and clea
