**All what is needed!**, Oct 26th, 2005

Reviewed By: AMDesigns

I purchased this script today and it was setup and ready to rumble within a couple of minutes. The admin uplod files need to get a small fix though but nothing big. A nice script for that price and highly recommended.

**Outstanding software**, Jan 5th, 2006

Reviewed By: ZeroFunk

I needed to speed up the development of my business so instead of outsourcing, I purchased this software. I am glad I did. It works great and offers very clean and secure code. As a programmer myself, I am very picky about using other people's code. But, I fully recommend this software to anyone wanting to save time or for those who are not programmers. Anyone can contact me for a reference, I love the software!
