Easy State Map

Hits: 2,520

Description: Easy State Map is the fastest and simplest way to add interactive flash US maps to your website! Easy State Map is perfect for business directories, store locators, service providers, or any other site where your visitors need to quickly and easily locate subjects based on geographic location. Easy State Map is easy to use and works on any website and virtually any web host. Use it by itself with simple HTML pages, or combine the flexibility of Easy State map with your favorite scripting language to create powerful and intuitive directories and websites.

Choose Easy State Map Lite for the most cost effective solution, or Easy State Map Basic in one of our eight attractive color combinations. Looking for total flexibility? Easy State Map Pro lets you have it all! Set your own colors for the map background, states, state "hover" effects, and text and labels.
