Kiwi Logger

Hits: 1,240

Description: Kiwi Logger (KLOG) is a free suite of syslog message sending tools for Windows. The tools allow you to add syslog message sending capabilities, via UDP or TCP, to your applications. The syslog messages can be received by Kiwi Syslog Daemon or compatible Syslog Daemons. You can access KLOG via console command line, Windows command line, Win32 API DLL , .Net DLL, COM DLL or ASP DLL.
