Hercules Image/Banner Rotator v.1.08 SS Hits: 9,053

Description: Hercules Image Rotator is a PHP script, which rotates your images/banners with a JPG (JPEG), GIF, or PNG extension from any location. Hercules Image Rotator uses Flat File (txt file) and does not need MySQL or any other DB. Does not need Java or JavaScript enabled. It is very simple to sets the image/banner dimensions and time to rotate it. Possibility for instalation on HTML pages. Possibility for multiple rotators with different dimension and different rotation times on one page and faster displaying on both PHP or HTML instalation. New feature - random image displaying.
