Remotely Hosted PHPnuke Software

Hits: 3,436

Description: This script published by AdvantiScript allows you to run multiple seperated PHP-Nuke portals off a single installation and database, and as such to run your own PHP-Nuke host

Features:

- Subdomain (theirsite.yoursite.com) url
- Give users have full control over their portal
- Host up to 1000 portals off a shared hosting account
- Auto insert headers and footers - Extensive admin panel to perform managing tasks
- Allow your users to upgrade to a adfree account via Paypal
- Allmost all modules supported
- All themes supported
- Users can use their own logo's as header
- ALL database access (backup and optimization) disabled

This script is perfectly able to boost your sites popularity, by giving your users a fully rigged PHP-Nuke powered CMS

A very good script indeed

Support from advantiscript.com was very good

Its running well and no problems.

Very, Very Good!, Nov 18th, 2005
