**Description:** SSphp stands for Simple Site PHP. SSphp is a site content management tool that makes creating and maintaining a professional and clean-looking site easy. If you want an easy way to manage a site, or get one up fast, this is it. DON'T use it if you expect a lot of extras, like enhanced modules and RSS feeds and whatnot.

## SSphp features

- easy installation
- multi-user support
- themes/templating
- admin protected sections
- easy configuration and management
