# G-Encoder

Hits: 2,879

**Description:** G-Encoder is a PHP script to encode, obfuscate, and compress (only for scripts with above 2kb size).

This script is using ZLIB and base64\_encode() to encode your PHP source code. This is not PHP encryptor, someone who knows PHP/Programming probably could decode the result.

G-Encoder has some features like Time Limiter and Address Binding. of course, it's free.

## Resource Specifications

<b>Version:</b>	1.0
<b>Platform(s):</b>	linux, windows, freebsd
<b>Date Added:</b>	Nov 7th, 2005
<b>Last Updated:</b>	Nov 7th, 2005
<b>Author:</b>	Yohanes A. Pradono
