I would like to say how pleased I am with the support that I have received with this application. I did have the option of a much cheaper product but chose your company based on the initial responses that I received to my pre-sales queries.

My decision to purchase your product has proved to be the right one. The look and feel of the whole product is very professional and given the saving in development time represents excellent value for money!

Their support is beyond good !, Mar 29th, 2008

Hi, after looking around for a long time and buying some of the other programs around, testing and failing (a LOT), I must say I got a super good deal at AspNetDating.com as they deliver a very good program and not to mention the amazingly good support. I have been around on internet working with scripts since 1995 and I must say this is the first time I get this degree of support. I have not bought any extra features but can imagine that if I will it will be of high quality. Thank you guys.
