# MiPhoto

Hits: 15,448

**Description:** MiPhoto is an advanced photo rating (HotOrNot) and/or dating website script with VIDEO support! With an integrated payment system, members can purchase memberships to access different features on the site, control by the administrator. MiPhoto also allows administrators to create their own profile fields to further themselves from similar sites and to have multiple rating categories other than the normal Male and Female. With the template system, an administrator can easily customize the look and feel of the site with HTML code. A built-in private messaging system allows users to communicate without revealing their email address, allowing privacy for your members. With the Pro version you will receive the Forum Plugin for free. The Forum Plugin allows users to communicate with each other and will enable a user to use their MiPhoto account to access the forum.

### **So Far The BEST VOTING SCRIPT EVER**, May 29th, 2006

Reviewed By: pippen

I have just got this script it its so far known the best compared to IRATER and its worth every dollar. Michale is an amazing and smart person who will be ther for you and your site ever its needed. Regarding the scrip this is a A+ script has almost everything you would want for a hot or not script. Techincall Support aswellll is a A+.

### **Excellent Product**, Jun 9th, 2006

Reviewed By: phil@philio.net

As a software consultant/Web Design firm, this photo voting system is excellent, fast and the best on the net! The tech support from the developer is the A++ superb! He is always there to help. You won't be wasting your money on this product so it comes HIGHLY recommended.

### **SandM4u Reviews MiPhoto**, Mar 12th, 2007

I bought the MiPhoto script from MicroScripts.net, and 3 weeks later the website was up and running to my clients specifications. Very nice, feature rich and well supported script. It's after-sales services is one of the best I've come across for a script package in my time as a web developer.

Well worth every penny... or dollar.

This is one of the best and easiest scripts I've used. I also can't say enough about the support staff. Mr. Deal has answered every question, and made every customization change that I ask for VERY quickly. This script is great and the support is excellent. Prices are very reasonable for any customizations. Thank you, Mr. Deal.

### **Amazing Script!**, Mar 20th, 2007

Reviewed By: zefexcompany

I was leary at first in buying this script because it is encoded with Zend. But the script uses templates (tpl's) and makes it easy to integrate other scripts and to modify! I was also worried about not being able to fix any bugs if i found some, well not only did i not find any bugs but the company helped me to fix my website the way i wanted too!!! They logged in and helped me make changes in about an hour or so! I was really impressed with their customer service. **HIGHLY RECOMENDED!! No BUGS!**

### **Your search is over! I promise!**, Aug 17th, 2007

I studied many options for "hot or not" like scripting options before finally settling on this option and I am thrilled. MiPhoto has a very reasonable price tag. Also, the programmer did a wonderful job of protecting the source code while at the same time making the interface **HIGHLY** customizable--this is rare in a product like this. I did make one support inquiry and the perfect solution was waiting in my email inbox within a few hours. As the subject line says--your search is over!

### **Mii Photo Hot or Not dating system**, Oct 21st, 2007

Reviewed By: ioajy003

I am a novice programming, Actually dropped out of computer science. The support for Mii Photo was excellent, usually replying to me within 24 hours. I had the software installed to the server so it was pretty much just plug and play. The page templates are easily configurable and new fields are easily intergrated.

### **So far, so good...**, Nov 8th, 2007

Reviewed By: etomp10291

Installed easily, website was up and running quickly. I am still customizing the site but so far, so good. Have had no issues other than my original host did not support the "zend optimizer" which is required to run script. I am anxious to see how it handles alot of simultaneous users but I assume from what I have seen it will do well. I am using it for a dating site.

Great product and great support. Michael has been very responsive in helping me to customize the script and address any glitches-I highly recommend.

**The best rating script by far!!!**, Feb 29th, 2008

Reviewed By: charles123

This is one of the best scripts used for rating i ever came across. The tech support is compared to none. Michael usually answered and fixed my issues within 24 hours, way sooner most of the times. He even added some extra features I had asked for. I went threw a lot of rating scripts, but this one was by far the best. Easy installation, extremely well documented, easy to setup preferences, all in all if you are looking for an incredible rating script this is the one. Don't look any further, it
