AuthBot ASP Script

Hits: 3,001

Description: AuthBot is a simple asp image verification that you can use to increase the security of your online forms, such as user logins, contact forms, or email forms by verifying a dynamically generated random security code. Authbot accomplishes this without making users struggle to read skewed or misaligned text images, Using Flash it creates a clearly readable piece of text that is NOT readable by machine.

Give it a try!
