VFS

Hits: 17,874

Description: VFS (Virtual File System) is a Web-based system that allows authorised users to upload and download files. It is a file sharing utility aimed at communities that wish to share files across the Internet and where traditional mechanisms aren't appropriate or efficient. VFS tries to give users the ability to share their files with exactly who they wish and to ensure that their confidential files remain confidential and other files are shared openly.
