Free Download Site

Hits: 16,796

Description: This package allows you set up a profitable download site without the need for fiddly databases or other needless complications. Simply upload the files and the site is ready. Easy to customise and takes up very little space itself. Comes with a "starter pack" of files to optionally offer for download. Designed to take google (or other) ad's well, from the outset, the download system creates a multi-category, multi-depth site that is easily advertising enabled and automatically interlinked. Unlimited categories, flexible depth (default is 6) with every page ready to cause simple and flexible page rank and every page able to carry ads. Each category can have custom content added that is shown only in that category and the help text comes with a short guide on the subject of advanced use. Used to power the very site that provides it this is already a powerful and well developed script.

Resource Specifications
