# GEO GENERATOR - Graphical Keyword Generator Hits: 3,824

**Description:** A majority of people on the Internet are searching for local results. It's time to capitalize on those searches. GEO GENERATOR is a simple PHP program that allows you to match your product or service with over 30,000 US cities and states.

Let's say you are a florist in your city and state. With GEO GENERATOR you can create a 30,000+ keyword list to attract customers outside of your area. Our program asks you for your keyword and within seconds you have a text file of all US cities and states along with your keyword. See an example below.

Example Output:

New York Florist  
Florist New York  
Manhattan Florist  
Florist Manhattan  
And so on...
