MAPILab Rules for Exchange

Hits: 917

Description: Program for creating and managing Microsoft Exchange Server and Small Business Server 2000/2003 server rules for processing incoming messages. The product provides much more flexibility and functionality than server rules created in Microsoft Outlook, supports any message types and uses a completely new technology in its work.

No support!, May 26th, 2008

Reviewed By: Noman1970

It doesn't work for outgoing emails. No response from support team. Waste of time and money. No refund possible. Look for them somewhere in Russia.
