Flash Video MX

Hits: 2,397

Description: Flash Video MX is a very easy-to-use yet professional software tool to convert your video to flash that can be played on Internet Explorer with high quality. It supports almost all types of source video files such as mpeg, avi, mpg, wmv, rm, rmvb, mov and so on, and can generate flash 7,8 video output, then get the flash on your web. With Flash Video MX, you can add special effects, movie beginning and movie end, edit video quality, frame rate, zoom scale and audio effect, and even replace the original audio with your favorite music to make flash! Convert video to flash is just a few clicks! Flash Video MX is also a good flv encoder, flash video encoder.

The Flash Video Batch Encoder is a professional tool in Flash Video MX, which is used to convert multiple video files at once. With the Flash Video Batch Encoder, you can select a list of video files and specify their encoding settings, then encode them at once by a single hit of a button.
