Php Website Translator

Hits: 4,537

Description: Php Website Translator allows search engine users to find your website between the results of search engine queries made in a language different from the one used in your pages . Using this tool you'll increase also the number of keywords related to your website , so you'll get more visitors ! The idea is to create a link on the home page of your website to a tree of translated pages and to show it only to search engine bots.
