EMS Data Comparer 2005 for PostgreSQL Hits: 924

Description: EMS Data Comparer for PostgreSQL is a powerful and easy-to-use utility for data comparison and synchronization. You can view all the differences in compared tables and execute an automatically generated script to eliminate these differences. Flexible customization of the comparison and synchronization process will enable you to select tables and fields for comparison and tune many other options. Data Comparer for PostgreSQL includes a graphical wizard, guiding you through the data comparison and synchronization process step by step, and a command-line service for synchronizing data in one-touch.

Resource Specifications	
Version:	(ver. 1.2)
