# Tab Menu XML

Hits: 6,179

**Description:** This flash menu will easily change the look and functionality of your web site, it has a nice looking design and it can be customized very easy, you don't need flash skills, all you need to do is change the text in the XML file, you open the XML file with a text editor like notepad from windows and you change the button text, url to open or other options like colors, time to remain expanded, etc. If you want the menu to do more than just open web sites: it can be used for more actions like going to a certain key frame inside a flash file, stop there, play from there, load an external movie into a given clip, and sure it can also open a web page. Menu will come with fla source file so you can customize it even more if you like.
