MSN Emoticons Script

Hits: 3,867

Description: This little chunk of code takes the string passed to it, and replaces any instances of MSN Emoticon codes with the corresponding icon. It's pretty basic, but still makes any page more friendlier, and familiar. All of the images and key codes are the same as with MSN Messenger 7, but could be easily changed to suit your needs.

Resource Specifications

Version:	1.2.6
Platform(s):	linux, windows, freebsd, osx, sun
Date Added:	Dec 5th, 2005
