TigerTom's Chat Room Software

Hits: 10,848

Description: TigerTom's Chat Room Software (TTChat) is a simple chat room with some surprising features. It's an easy set up. MySQL is not needed; it uses flat files. The membership database rotates; old users are dropped, so it's low maintenance. Designed for low server resource usage, while being easy to maintain. Has a bad word filter. Has a 'reserved names' option, so names like 'admin' or 'moderator' can't be used.

Note: Users need a JavaScript and cookies enabled browser.

Resource Specifications

Version:	1.0

Reviews for TigerTom's Chat Room Software

nice, clean and lean, Jan 12th, 2006

Reviewed By: rnjonjo

simply put, this software follows the mantra K.I.S.S (Keep It Simple Stupid).

if you want a software that works the way it's supposed to work (not to mention that it's free), then this is what u want!

if u want buggy software, that's complicated (and not free) then this is not it.

"Nuff said!
