VCD-db

Hits: 17,981

Description: VCD-db is a Free web based software that lets you manage your DVD/VCD/CDs collection on your own website. With VCD-db you can easily add new movies with 2 clicks, movie data is automatically fetched for you from IMDB and/or other sources. VCD-db is highly flexible, runs on multiple database platforms such as MySQL, MSSQL, IBM DB2, PostgreSQL and SQLite.

VCD-db supports multiple users so your friends can also register on your VCD-db web and start their own catalog, which can then be compared to yours for convenience. VCD-db has a built in loan system so you can now easily keep track of all the CD's you lend to friends and family, and even send automatic emails to ask them to return your CD's. User catalogs can easily be exported and saved in numerous ways, such as Excel, XML and can even be exported and then imported to another VCD-db site without any hassle.

VCD-db rocks, Feb 20th, 2006

Reviewed By: gdanen

This software rocks. I've been looking to catalog my DVD movies, and started using Excel. But I had to type everything, or at least cut and past. VCD-db makes all that unnecessary. It gets the info for your from IMDB. Way to go!
