phpkb knowledge base script is full value for money, Dec 16th, 2005

Reviewed By: kevinberke

I am a web developer myself and needed a rebrandable knowledgebase PHP script for one of the projects I was working on. I found phpkb the best among online knowledgebase scripts. It is very nicely coded, easy to understand and well commented PHP code, easily rebrandable and feature rich knowledge base script. It is an investment to purchase phpkb rather than an expense.

phpkb knowledgbase script is a great product, Jan 12th, 2006

Reviewed By: paul_rich

I purchased and installed the phpkb knowledgebase script version 1.0 and I love it! It is just what we needed to offer all the help items we had on list to customers whenever they need help. Thanks for a great product.

phpkb knowledgebase script is superb, Feb 3rd, 2006

Reviewed By: e_morcilo

We purchased phpkb a while ago to provide our customers with an easy to use knowledgebase system where they can easily find the answers to their support questions whenever they want on self serve basis. It installed perfectly fine on our webserver and let me tell you the installation wizard was so easy and perfect and it came with a detailed installation manual. We customized the script to suit our needs and everything went so fine. Thanks to the team at <http://www.knowledgebase-script.com> for support

phpkb is worth the money spent, Feb 10th, 2006

Reviewed By: gupta_n

I agree with the reviews submitted by other customers. phpkb is worth the money spent on it. Full source code was provided after purchase and code was esay to understand in order to modify it. Installing it on our server and setting up the knowledge base was like a breeze.

Very flexible knowledgebase system!, Mar 7th, 2006

Reviewed By: nir_ronen

I'm a web developer by profession and the best thing I found about phpkb knowledgebase is that they have not encrypted the source code. The code is well commented & I was able to change the phpkb's look and feel to match my website easily. Their technical support was quick (whenever desired). In short, I'd just like to reiterate the good things said by others. I wish them best of luck.

PHPKB for School use, May 19th, 2006

Reviewed By: techvik

We have researched a large number of PHP based knowledgebase systems; however we have found PHPKB to be the most feature filled, simplest to use and easiest to modify. The technical support for this product is fantastic, and all our questions and requests have been answered without delay. PHPKB will vastly improve our Helpdesk services and we highly recommend it to anyone in the market for a knowledgebase system.
