Gurt Java Table

Hits: 4,623

Description: Gurt Java Table is extremely fast and small Java applet, just the best free solution to present your table data in a compact attractive way, with sorting and sort ordering options and even in different languages. And don't care of number of rows, the applet is ready to receive data from even big DB tables on your server. No knowledge of Java programming is required, everything is simply adjusted with HTML parameters.
