## 5 Star Rating System

Hits: 31,004

**Description:** This is very easy to use rating system for your web site, you can use this product so that users can vote for your products, music, videos, pictures or any other listings you have on your web site, so that the other users will know how good a certain listing is by the score (stars) and the number of votes. No database is needed, no coding needed.

It is very easy to use, you will get all the source files, however you will only need 2 files for this system: rating.swf and rating.php, all you have to do is insert the swf in your page just like any other flash content and have the rating.php in same directory.

To add rating feature to another one of your listings all you have to do is duplicate the 2 files by copy / paste and rename them like this: rating\_photo.swf and php file will need to have same name: rating\_photo.php.

When users clicks to rate, values are recorded, new values are visible without reloading page.

Against duplicate voting: 3 things are verified including client IP.

### Resource Specifications

<b>Date Added:</b>	Dec 10th, 2005
<b>Last Updated:</b>	Apr 30th, 2007
<b>Author:</b>	adrianTNT

**Average Visitor Rating:**  **3.76** (out of 5)

Number of Ratings: 143 Votes

**Average Member Rating:**  **0.00** (out of 5)

Number of Reviews: 0 Reviews
