Surprisingly easy to configure, adapt and use, Feb 27th, 2003

Reviewed By: JanTuxen

I was surprised to see the very strong administration interface, allowing you to virtually adapt any aspect of polls to your needs. A lot of thought has been given to the features that can be configured. And so far, everything has worked instantly for me.

The few missing features I can think of (use of your own external style sheet and the ability to use several languages in a single poll) only occurred in my mind because of the many capabilities already built in.

I must give credit to the creators, this is an excellent script! The administration interface is really nice and easy to figure out, and the script installed in no time. The poll integrates straight into your page, the look is very flexible to match your needs. I highly recommend this script :)

So easy to use, Oct 21st, 2002

Reviewed By: victoriacclare

Installed and ran in minutes, does everything I needed too. Very nice indeed. Special commendation for the way that everything can be configured through the interface, and the ability to set polls to run for a set time.

Reviews for Advanced Poll Script

Quite nice, Sep 10th, 2001

Reviewed By: coyote

While I'm not a windows person... I thought that the windows-style installer and admin interface were VERY slick.

This is a nicely-done package, and I very much like that it was created with a mind to incorporating it into an existing design. I've seen many wonderful scripts, including bulletin boards that do NOT adequately separate code from presentation.

If all you need is a simple poll script tht calculates percentages form multiple choice offerings... I recommend this one.

It does not verify against a user database, (for member's only voting) and only one poll type seems supported. But for what it offers, it's about the best I've seen.

One of the greatest scripts I have ever seen.

Very well done.

Thanks.

This is a great script to use. Its very easy to set up and has tons of options and features. I would recommend this script if your looking for an online poll for your site.

Excellent PHP Poll Script!!, Jan 2nd, 2006

Reviewed By: tribalboy3000

After days of searching for the perfect script this was my final stop. Very impressed with everything this FREE Poll script had to offer. I just learned the basics of installing MYSQL and PHP code, this was very simple no problems and the Admin panel was very customizable and realized it allowed multiple polls on a page, not many freebies allow this. I would recommend this to anyone that needs a simple solution and a great product!!

This goody needs to be upped for php 5.x compatibility, Sep 17th, 2006

Reviewed By: latino2006

Well, this is the best poll script. But... it is a shame it didn't supports PHP 5.x. PHP 5.2 should be available within days. Also, poll type that allows comments is not protected from SPAM.

I rate it 4 because of the php 5 compatibility issue and SPAM vulnerability (only in the comments type poll). Otherwise it could be a 5.

Fix those two issues and it is a perfect "10".
