iRealty Property Script

Hits: 25,320

Description: iRealty is a cutting edge SEO-friendly PHP real estate classifieds software with multi-language user interface. Key features of iRealty: multi-language capabilities (XML lang file export/import), SEO-optimized URLs and content, videos and images for listings, custom "SOLD" sign and property ratings, UK and US Postal code/distance search and browsing features, listing calendar availability, editable look and feel (SMARTY templates) and code, multiple listing types (houses, apartments, businesses, land) with common and custom fields for each type; user groups (individuals, agents, businesses); pay-per-listing or subscription plans. Several payment options: 2Checkout, Paypal and Authorize.NET (can code custom payment gateways). Two standalone iRealty versions are for sale from as low as \$219, and one hosted version (\$49/mo). Customizations are available for an additional cost. Download and install iRealty on your server or view online DEMO.

Reviews for iRealty Property Script

Must-have for a search engine freindly web site., Feb 6th, 2008

Reviewed By: seo-web

Excellent script! I've reviewed dozens of real estate scripts, and this is the best one. I love the flexibility it provides, and seo features are really helpful.

The iRealty program is a great foundation software for what I wanted to build our site around. I recommend this software as a good starting point. The friendly people behind the company also add to its value. Rochan

Cute templates. Support is methodical, has live chat, although no phone support yet. I've created 3 websites using this script and it was always easy to upgrade my website to respond to emerging market trends! Good job, WorksForWeb.
