AddObject NLSMenu Professional

Hits: 16,735

Description: NlsMenu is search engine friendly cross browsers DHTML drop down menu. NlsMenu supports loading menu from HTML UL/LI tag structure, XML or Javascript, cross browsers effect, drop shadow, transparency and advanced borders, window edge detection, submenu orientation, and many others to create simple to complex drop down menu. Advanced options such as cross frame, popup/context menu, floating menu, AJAX menu (load on demand), render on demand, toolbar and dynamic functions greatly increase the usability of the menu, not only for website navigation also to enhance your web application. Modular design enable you to include only scripts you need to keep the download size small. Support, examples and comprehensive documentation included.

I have to say, this is amazing. Jack has AMAZING customer service, and the product is second to none. you can pay for something like Telerik, but you will get the same thing here for a fraction of the price. I would recommend this product again and again. And JACK... any product from this guy is worth getting.

PROPS JACK... BEST PRODUCT AND SERVICE ON THE WEB. BAR NONE!!!

Great Product, May 11th, 2006

What a great product for a great price! Not only is "NLSMenu Professional" an excellent tool for web design the tech support is the best that I have ever experienced with any product. Add Object allows you to add professional grade menus to your site even if you have little knowledge of script language. Their support staff helped me many times when I was lost due to my inexperience with script. Thanks for making my life so easy Add Object.
