Excellent Script!, Oct 3rd, 2007

I've been looking for a photo gallery script that simply displayed albums and photos, without a lot of complexity, and that could be easily embedded. With this script, I found it.

It is ridiculously easy to install. Configuration is a breeze. And incorporating into my site was simple. Just edit the template.php file (I added my header, footer, some javascript for good measure, and some tweaks to the css file). Take a look: <http://www.gwinnettband.org/gallery/index.php>

Highly recommended!

Extremely light and easy to manage, the layout is simple to customize and I love how it gets to business right when you load it up -- no install necessary.
