Easy to use, clean reports that show you exactly what you need to know. Logaholic will reveal valueable information in ways no other php script can. Visualize click-thru Rates on all pages, get detailed visitor analysis, conversion tracking, in-depth keyword and search engine analysis. Logaholic tracks EVERYTHING because it reads your log file - no need to integrate tracker codes. NO subscriptions, NO over complicated screens, NO 3rd party servers.

I can finally see!, May 17th, 2007

I am not a real techy so I guess I took the long road there, however when I finally reached LOGAHOLIC, I knew my Quest had come to an end. Believe me LOGAHOLIC, at that pricelevel, if they maintain developing like this, apart from the great service, will become the new standard in Web Statistics. THIS SOFTWARE IS GREAT, a must have tool if you wanna see what is going on on your web site.
