Profile Manager Premium

Hits: 4,037

Description: Profile Manager Premium is a database driven advanced membership and profile management system. When a user registers, it automatically adds the information about the user into the database. After registration process, user can log on the system by using his/her login and password. Any time point the user can see/modify/delete his profile or search others profiles. You have total power over abilities of the users or the design of the pages. The Premium version also has features like admin(delete user, logon and user statistics, database backup, email or internal messaging to users etc.), upload picture, lost password, advanced listing, searching and categorizing features. Now supports PayPal and ClickBank subscriptions. The new version has a nice looking social application design and an application builder. You can create many different kinds of user content entry and listing pages using PM Premium's application builder.

The finished product has a good look to it, but you have to be an expert at html and perl. Even if you are an expert, there is no documentation to tell you where to find things. e-mail support is very slow. The support forum has lots of info, but there is no search to find what you are looking for. I regret not sticking to the free scripts because most of them are easier to use and have better documentation and support. \$199 - no way!! You might find it easier to write it yourself.
