# JAB Guest Book

Hits: 9,074

**Description:** JAB Guest Book is a free guest book written in PHP, it works using flat files to store data which means no database is needed. Features include easy installation and customisation into your existing website. An administration panel which allows you to delete posts and ban users, additional administration configuration to un-ban users and to use the bad word filter. Ability for users to post messages with topic, email and comments including emotions (smilies). The main guest book works completely using only one file. Created by James Barnsley. ([www.poundingbeats.com](http://www.poundingbeats.com))

## Resource Specifications

|                      |                                   |
|----------------------|-----------------------------------|
| <b>Version:</b>      | 1                                 |
