Insta-Store Online Mall Maker

Hits: 2,491

Description: Insta-Store is your online mall maker script. With this very versatile script you can offer an online shopping mall for any kind of web site. How it works is that you get merchants / visitors to sign up either for free or for a fee. They fill up your mall with items that they want to sell. They can create a Mall Me Page. Best yet, payment processors are generated for PayPal, Payloadz, SFIPay, StormPay and also a print order form for checks / money orders.
