I am a long time customer and I just upgraded to the Executive Edition. I can say that this is a great company and I have suggested their products to 2 other people; both agree with me. I did suggest to them that they offer design template options other than the default design. The default design is very good but I have asked them to work on getting a variety of template designs for the engine. After 8 months with them I can say that they have great support and would purchase from them again.

Wow! What great support!, Aug 20th, 2007

I purchased the Executive Edition Search Engine and my server has some settings that needed to be worked around. John (support) spent two days modifying the program to work around the server issues. I couldn't be happier with the results. The program is great and support goes above and beyond to make sure you are happy and everything is functioning correctly. I highly recommend this product and kudos to the developers and support!

Do not be their victim!!!, Sep 12th, 2008

I purchased their script 1st year and I regret about this. With their script you can not develop anything or customize to match with your needs.(all php files are encrypted).

So keep in your mind that what you see in the demo from their website, will be the same in your site BUT you can not change anything :)

I finally put this script in the dust bin since it is useless!!! Take care!
