Veinotte's Member Manager

Hits: 4,925

Description: Member Manager 1.01 is a basic password management program. It allows you to add and remove members from your password and users files (.htpasswd and .htgroup) from your browser. It does NOT protect a directory, nor does it create the password files for you. It is intended only to be used as a management script for adding and removing users from the authorized list.

Resource Specifications
