FreshBooks - Painless Billing

Hits: 5,885

Description: Secure web based invoicing service with online payment. Allows you to send invoices by email or ground mail. User friendly features include recurring billing, employee timesheets, project management, document sharing, reporting tools and a support/ticketing system to help keep track of client issues. You can also fully customize the look of your billing system and your invoice template. Ideal for freelancers, web designers, consultants and service providers. Easily accept payment with plugins like PayPal, Authorize.Net, VeriSign, Electracash, PSiGate, Paradata and more. Let FreshBooks automatically create invoices and send late payment notifications. View robust reports and import/export your data. A custom login page can be created to match the look of your company website so staff and clients feel at home when logging in.
